

ENSCO Sustainability Report Statement

ENSCO is committed to sustainability. As such, this report represents our first public disclosure of pertinent and relevant information. ENSCO has undertaken for the first time the calculation of our Scope 1 and 2 Greenhouse Gas (GHG) emissions for FY22, (July 1, 2021 – June 30, 2022) and hereby provides the results.

GHG Emissions FY22 (7/1/2021 – 6/30/2022)

Scope	Source	FY22 Emissions (tCO ₂ e)
1	Stationary Combustion of Fuel	580
1	Mobile Combustion, Fleets	106
1	Refrigerants	132
2	Purchased Electricity, location-based	1,497
2	Purchased Electricity, market-based	1,491
	Total Emissions, FY22 (tCO₂e)	2,315

GHG Emission Intensity Ratio

Total Scope 1 & 2 Emissions Per Employee (tCO ₂ e/FTE)	3.3
Total Scope 1 & 2 Emissions Per Floor Area (tCO ₂ e/sqft)	0.009

GHG Emissions Methodology

ENSCO has calculated Scope 1 and 2 emissions for the FY22 period using an operational control approach in accordance with the GHG Protocol.

- **Scope 1:** Direct greenhouse gas emissions from sources owned or controlled by the company, such as emissions from gas, oil, and company vehicles.
- **Scope 2:** Indirect greenhouse gas emissions from sources owned or controlled by the company, such as emissions from consumption of purchased electricity, heat, or steam.

Boundary Disclaimer: ENSCO's Surface Transportation Group assumed operational management in October 2022 of the Transportation Technology Center (TTC), a 52-square-mile research, testing, and training facility owned by the Federal Rail Administration (FRA). Given ENSCO's operation of the TTC site falls outside of the current FY22 reporting boundary for emissions, ENSCO will assess boundaries for inclusion into the FY23 GHG inventory and public disclosure.

Estimations

Where data was not available, ENSCO utilized estimation methods in-line with the GHG Protocol, including use of proxy data, regional intensities and averages.

Restatements

As new or more accurate information is made available to ENSCO, we plan to periodically recalculate our emissions, and will transparently restate as needed.

ENSCO Governance

Sustainability at ENSCO is overseen by a working group comprised of ENSCO's Chief Financial Officer (CFO), Director of Contracts, and Director of Facilities. Each of these three positions report to ENSCO's President, who meets with ENSCO's Board of Directors quarterly. Sustainability updates are shared as needed and available through this hierarchy.

Forward-looking statements

This report may include predictions, estimates, or other information that might be considered forward-looking statements within the safe harbor provisions of the U.S. federal securities laws. Words such as "may," "will," "should," "expects," "intends," "projects," "plans," "believes," "estimates," "targets," "anticipates," and similar expressions identify forward-looking statements in this webpage. Such statements include, but are not limited to, statements about future financial and operating results, plans, objectives, expectations and intentions, and other statements that are not historical facts. These statements are subject to numerous assumptions, risks, uncertainties, and other factors, many of which are outside the control of ENSCO. While these forward-looking statements represent our current understanding of the future and upcoming events, and our opinions as of the date of this publication, and they are subject to risks and uncertainties, known and unknown that could cause actual results to change or differ materially. You are cautioned not to place undue reliance on these forward-looking statements. ENSCO is not obligating ourselves to revise or publicly release the results of any revision to these forward-looking statements in light of new information or future events, unless required by law.
