

CRITICAL ASSET PROTECTION

SECURITY SOLUTIONS

 **ENSCO, Inc.**

Innovation Starts Here

THE THREAT IS EVER-CHANGING

Accidents, natural disasters, insider threats, cyber attacks, criminal activity, and terrorist events are facts of life. ENSCO's knowledge, experience, and ability to adapt to client needs provide businesses, private institutions and government entities the services they need to optimize their security program and minimize their risks. ENSCO's proven approach helps protect people and critical assets by providing expert identification of vulnerabilities and by recommending practical, low-cost solutions to security deficiencies.

SECURITY IS A SYSTEM

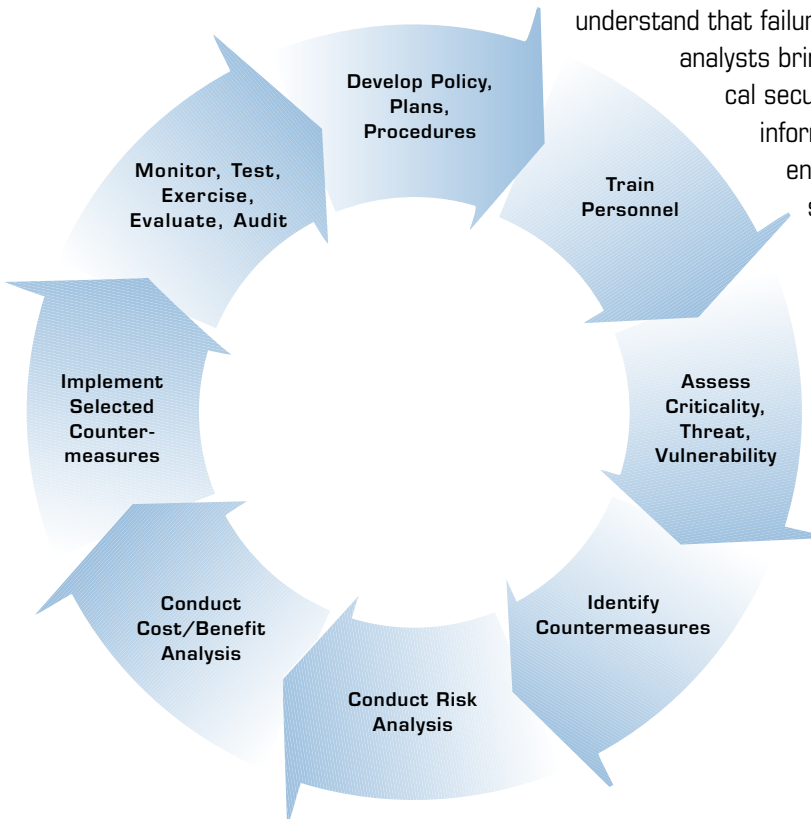

There is no magic solution for security issues. The most successful approaches understand the interaction between the interrelated parts of the security system. The best technology in the world is not effective without good plans and procedures for its use. Conversely, the most highly trained security force is not effective without proper technology. Security components must be integrated. The key is to understand the optimal balance for a security system. ENSCO understands this balance.

EXPERIENCE COUNTS

ENSCO's approach has been in use since 1985. Our analysts have an average of more than 20 years of experience solving complex security challenges in demanding environments—we

understand that failure can be disastrous. Our analysts bring backgrounds in physical security, personnel security, information security, and law enforcement. In addition, several of our analysts are board-certified by ASIS International as Certified Protection Professionals (CPP) and/or Physical Security Professionals (PSP). ENSCO's services are specifically tailored to our clients' needs, site and threat spectrum.

PROVEN APPROACH

ENSCO provided security services long before the attacks of Sept. 11th; we have been providing security services for more than 20 years. We have successfully provided evaluations and recommendations to more than 200 clients to protect personnel, facilities, and operations. Our approach to security has been used in a wide variety of environments, from hospitals to critical command and control facilities.

Our security analysis process has been successfully used with a variety of customers:

- Department of Defense
- Army
- Navy
- Air Force
- Department of the Interior
- NATO
- United Nations
- NASA
- FAA
- U.S. Department of State
- Centers for Disease Control
- AAR
- FRA
- AMTRAK
- Various commercial entities including hospitals, pharmaceutical makers, aircraft manufacturers, and micro-electronics companies

ENSCO Security Solutions...
Clear solutions for complex security challenges
