

MicroSearch[®]

Security That Doesn't Miss A Beat

MicroSearch, the patented human presence detection system, is available in a variety of configurations to meet your unique requirements.

MicroSearch is a one-of-a-kind security inspection system that detects human beings hiding in vehicles or containers loaded on vehicles by sensing the vibrations caused by the human heartbeat. It is ideal for vehicle inspections at correctional facilities, high-value facilities, border crossings and seaports.

MicroSearch[®] G3 Technical Specification Sheet NEMA-Rated Retractable Cable Management System for MicroSearch G3

Cable Reels

- Ideal for indoor/outdoor use
- Retractable
- Slip ring assembly
- Heavy steel construction
- Powder-coat finish
- Cables come pre-assembled to reel

Enclosure

- Ideal for indoor/outdoor use
- NEMA 4 and 12 rated
- Heavy steel construction
- Powder-coat finish
- Provides area to store electronics box and sensors when not in use

Note: The overall dimensions of the MicroSearch G3 Cable Management System are 44" x 18" x 21" (111cm x 45cm x 53cm). The unit weighs approximately 300 lbs (136kg).
